REL WIRELESS FOR DEDICATED HOME THEATERS

TOP

We've stripped back the High Level feature from the Arrow™ wireless to provide a wireless system dedicated for Home Theater buffs. Though HT-Air™ is affordable, it retains our single-minded focus on delivering zero compression and maximum dynamics. Big, rich sounding bass, not the thin, dry sound most wireless systems supply.

Zero compression means that, unlike common Bluetooth-based wireless subs, REL transmits in real time, with no digital compression that can add significant amounts of delay to the signal. Delay that, when trying to mate up to conventionally wired speakers means many subwoofer's wireless offerings are hopelessly behind the loudspeakers.

Freedom: HT-Air provides the necessary freedom to place your HT exactly where you need it for best performance. It also allows for easy placement of rear or side surround channels to be augmented without having to incur the expense of custom wiring being added into your bid.

Finally, freedom means being able to place your Serie HT where it will look its best in your theater. For many, out of sight is an ideal result.

Fast, Simple Pairing: With all the experience REL has in delivering easy-to-use zero compression subwoofers, we have perfected simple, fast pairing of our wireless devices. HT-Air takes less than 10 seconds to get working, just plug both sender and receiver in and push the rear panel pairing switches and you're done. Simple as that.

Freedom!

Want to move your sub from an awkward place? Hide it from the wife/partner? ✕

This is the product for you! pretty impressive range I have it at about 7 meters from the amp and behind a couch, no one has to see it but it can sure be heard!

Not experienced any latency issues so pretty much does what it says on the tin.

Perfect. This device completely got ride of ground / hum noise on my Rel T9

Perfect. This device completely got ride of ground / hum noise on my Rel T9.

I am using a dual mono amp and it is impossible to hook up a single rel subwoofer with out getting hum noise. But this device completely gets rid of that noise and to top it all, the price is right.

I am compelled to write this review due to the end resu...Read More

Clean Sound

Great. Works with any subwoofer. Clean sound. No popping like the rocket fish.

Works great

This is my second wireless kit. I've had my first one for a couple years and works flawlessly. Bought a second one for my second sub. No issues. Highly recommended.

Great Product

Moderately priced product that works. I have an older DCM subwoofer that I wanted across the room from my receiver and TV. The bluetooth receiver and transmitter paired quickly and is working flawlessly.
